The screenshot displays the Wireshark network protocol analyzer interface. The top menu bar includes File, Edit, Capture, Analyze, Statistics, Tools, and Help. The main window is divided into three panes:

- Packet List:** Shows a list of captured packets. The selected packet is a GET request from 192.168.1.104 to 192.168.1.1.
- Packet Details:** Displays the structure of the selected packet. The selected packet is a GET request from 192.168.1.104 to 192.168.1.1.
- Packet Bytes:** Shows the raw data of the selected packet, including the status line '200 OK' and various headers.

The selected packet is a GET request from 192.168.1.104 to 192.168.1.1. The packet details pane shows the request structure, including the status line '200 OK' and various headers. The packet bytes pane shows the raw data of the response, including the status line and headers.

A terminal window titled "adh@adh-VirtualBox: ~/Desktop" is shown. The window has a dark background with a sidebar on the left containing icons for Activities, Terminal, and a file manager. The terminal output shows the user 'adh' attempting to view 'test5.txt' with 'cat', then trying to change permissions with 'chmod'. The first 'chmod' command fails with an 'invalid mode' error. The second 'chmod' command fails with a 'cannot access' error because the file does not exist. The user then switches to 'test4.txt' and successfully changes its permissions. The terminal window includes standard Ubuntu window controls (minimize, maximize, close) and system status icons (network, volume, power) in the top right corner.

```
adh@adh-VirtualBox:~/Desktop$ cat> test5.txt
adh
arj
^C
adh@adh-VirtualBox:~/Desktop$ chmod g-rwx test5.txt
adh@adh-VirtualBox:~/Desktop$ chmod 0-rwx test5.txt
chmod: invalid mode: '0-rwx'
Try 'chmod --help' for more information.
adh@adh-VirtualBox:~/Desktop$ chmod o-rwx test5.txt
adh@adh-VirtualBox:~/Desktop$ chmod g-rwx test5.txt
chmod: cannot access 'test5.txt': No such file or directory
adh@adh-VirtualBox:~/Desktop$ cat> test4.txt
adh
arj
^C
adh@adh-VirtualBox:~/Desktop$ chmod g-rwx test5.txt
chmod: cannot access 'test5.txt': No such file or directory
adh@adh-VirtualBox:~/Desktop$ chmod g-rwx test4.txt
adh@adh-VirtualBox:~/Desktop$ chmod o-rwx test4.txt
adh@adh-VirtualBox:~/Desktop$ cat test4.txt
adh
arj
adh@adh-VirtualBox:~/Desktop$
```
